

PATENT

1.121(a)(3)(ii)). Applicant asserts that no new matter has been added and that it is anticipated that the Examiner will recommend that these amendments be entered:

In the Specification:

Page 7, line 23; replace “5a&b” with --5a,b&c--.

Page 21, line 7; insert after “signals” -- (some of which are shown in **Fig. 5c**) --

REMARKS

Applicant includes copies of amended Fig. 5b and Fig. 5c along with a copy of the Fig. 5b as filed but with red ink markings.

The draftperson's patent drawing review marked the “View and enlarged view not labeled properly” referring to Fig. 5b. Applicant separated the circuit drawing from the signal drawing leaving the circuit drawing as Fig. 5b and making a new figure of the signal drawing as Fig. 5c. The above amendments make the specification correspond to the formal drawings.

Should any additional issues remain, or if I can be of any additional assistance, please do not hesitate to contact me at (650) 947-0700 x 309.

Respectfully submitted,
